Redux-Saga  
Redux Toolkit  
HTML/CSS  
Git  
Github  
Azure DevOps  
CI/CD Pipeline  
Docker

## Work History

---

- Sept 2021 - Present    **Software Engineer II**  
*GIANT MACHINES, New York, NY*
- Designed and developed new portal feature for administrative tasks to mitigate heightened risk of bad data directly resulting from direct database manipulation
  - Built and deployed microservice to Azure in Node.js/Express.js and TypeScript using Cloudbees Jenkins Docker CI/CD
  - Promoted from apprentice to Software Engineer II in 12 months
  - Collaborate with key stakeholders, senior leadership, design, product and qa for project planning and overall product life cycle
  - Provide mentorship and guidance to both client and internal newly hired engineers to improve efficiency of onboarding process
- Sept 2014 - Sept 2022    **International Flight Attendant**  
*AMERICAN AIRLINES, New York, NY*
- Utilized SABRE operating system to construct monthly work schedules and research flight information
  - Elevated customer experience using prior fine dining training, serving 200+ individuals both independently and in a team without supervision, resulting in multiple 'Above and Beyond' certificates of recognition
  - Provided leadership and reasoning as Purser for a 13+ person crew on long range international flights
  - Ensured the safety, security and comfort of all customers by utilizing crew resource management to respond to a variety of situations
  - Provided first aid in absence of medical professionals during emergencies

## Education

---

**Technical Certificate: Immersive Full Stack Software Engineering Bootcamp**  
*Flatiron School - New York, NY*

**Bachelors of Science: Marketing**  
*Rutgers University - Newark, NJ*

## Personal Projects

---

- MyStyle** - [Github](#) | [Demo](#)  
Never waste time trying on outfits. With MyStyle, a user can manage their closet and try on outfits digitally.
- Programmed with Rails 5 API server for ease, PostgreSQL database and React.js frontend
  - Utilized Bootstrap, Material-UI, Semantic-UI and custom CSS for closet and clothing fit
- DJ Booker** - [Github](#) | [Demo](#)  
With Booker, all available DJs are in one spot, available for hire at the click of a button.
- Developed with Rails backend, PostgreSQL and React.js frontend
  - Designed using Semantic-UI for multiple components, forms and buttons and custom CSS
